## Personal statement:

With 5+ years of experience in quality assurance software engineering and technical project management, I deliver solutions that enhance customer satisfaction and loyalty. I have led cross-functional teams through backlog reviews, sprint planning, and daily stand-ups, driving a 41% increase in test case coverage. Currently stepping into Engineering Manager responsibilities, I am building on my leadership of a mobile team and preparing for full transition into the role. I am passionate about fostering a culture of excellence, and I always push for excellence in my work, no matter what role I hold.

## Areas of expertise:

- Software Quality Assurance and Testing: Expert in designing and implementing manual and automated testing strategies, as well as introducing performance testing to improve the performance of public-facing solutions and automation of blackbox testing to reduce vulnerability risk.
- Team Management and Leadership: Proven ability to lead and motivate teams to deliver high-quality products on time and within budget, including setting up teams to address issues and bring improvements.
- Agile Methodologies: Experienced in working within Agile environments, using Scrum (Code freeze during Release) and Kanban methodologies (Jira) to improve development processes and drive continuous improvement.
- Bug prevention: Proactively anticipate issues with new features, initiate measures to ensure testability, advocate for early testing involvement, and provide quick feedback to streamline the development process.
- Engineering Leadership & Growth: Actively involved in shaping cross-team collaboration and product quality metrics, running RCA sessions, team health checks, and retrospectives. Work closely with Engineering Managers and Directors on shared initiatives to promote team growth, delivery excellence, and organizational impact.

## Skills:

### Technical Skills:

- Proficient in programming languages such as Java, Python, JavaScript and gained experience working with .NET Core with C# on a personal project for 5 months
- Experienced in database management systems such as Azure SQL and MySQL Workbench
- Skilled in web development frameworks such as React
- Knowledgeable in software testing methodologies including performance testing and test automation
- Familiarity with DevOps tools such as Docker, Ansible and GitHub Actions
- Strong understanding of agile development principles

### Soft Skills:

- Excellent communication and collaboration skills
- Strong problem-solving and analytical skills
- Ability to work effectively in a team environment
- Dedication to continuous learning and professional development
- Self-management, taking ownership and responsibility
- Strategic thinking and initiative-taking, with a focus on long-term team and organizational performance improvements
- Leadership presence in engineering forums and OKR planning, progressing toward Engineering Manager responsibilities

## Work experience:

Quinyx - London (Sweden based company; Team based in Serbia, Sweden and London)

QA Automation Engineer 2023 - Present

Technologies: 100% cloud based. FE:   BE:   API tests: 

E2E tests:    AI:    Other:        

- Actively lead the team by overseeing backlog reviews, sprint planning sessions, stand-ups, and retrospectives, ensuring alignment with project goals and timely delivery of features.
- Integrated data capture into testing, enabling data-driven decisions and led daily stand-ups/retrospectives for effective team alignment.
- Led E2E testing, empowering cross-functional teams to own their testing processes, including guiding backend developers in API testing.
- Proactively maintained and upgraded E2E testing methodologies, leading to improved test coverage and effectiveness of 52% of regression for both platforms Android and iOS.
- Fostered a collaborative team environment with contractors, which directly contributed to a 41% increase in our test case repository (from 128 to 181), enhancing our testing breadth.
- Initiated and maintained comprehensive documentation for automation setup, ensuring seamless onboarding.

- Collaborated closely with the Engineering Director to enhance not just team performance, but quality and delivery standards across the broader engineering area and organisation.

## Symplectic - London

QA Engineer 2021 - 2023

Technologies: 100% on-premises. FE:   BE:  API tests:  E2E tests:   Other:       

- Designed and implemented a data-driven test automation suite for a public-facing solution used by clients, automating over 80% of the E2E tests, resulting in a significant reduction in bugs and enhanced overall performance.
- Upgraded and modified existing automation suite, reviewed code and black box, and GUI test cases.
- Implemented OWASP ZAP as a proof of concept, running it alongside our E2E tests to identify vulnerabilities and potential security risks. After successful integration, it was adopted into the release pipeline and is actively used by the team to detect security flaws in future releases.
- Introduced performance testing for the public-facing solution to optimize website load times, resulting in improved user experience and customer satisfaction.
- Collaborated with cross-functional teams and business experts to define requirements, and contributed to process and architecture improvements.

## Thermostar UK - London

Business Process Improvement Manager 2016 - 2021

- Conducted quality assurance assessments on new system designs to ensure compliance with functional and technical requirements, improving deliverable quality.
- Spearheaded technical architecture and infrastructure developments, providing expert consultation to the management team on system design and feasibility.
- Developed and maintained system technical architectures based on business needs, resulting in successful delivery of proposed work within tight deadlines.
- Hired, guided and mentored junior consultants, improving their performance and efficiency.

## Education

Sep 2016 - May 2018

Imperial College London

Masters in Physics

Emitter coupling in plasmonic nano-cavity

Sep 2013 - Jun 2016

University of Kent Canterbury

Bachelors in Physics

First Class  
Honours

Nov 2011 - Jun 2013

Phoenix Academy Sixth Form

A levels

Maths, Physics, Media and business studies

Sep 2001 - Nov 2011

Riga Classical Gymnasium

GSCE equivalent

Riga  
Latvia

## Hobbies and interests

### Industry Engagement

Attending after work events on tech and leadership.

### Sport activities

Actively participating in various sport activities.

### Production / Directing

Acting, producing and directing.

### Reading

Reading various books and articles around self development.
